Mercredi 12 Décembre 2018
Wednesday 12th of December 2018
10h – 12h

Socio-Economic intricacies related to Climate Change Towards an EU-Med research agenda and actions

Union for the Mediterranean, Institut de la Méditerranée, FEMISE, ENERGIES 2050

Union for the Mediterranean
Union pour la Méditerranée
الإتحاد من أجل المتوسط

Institut de la Méditerranée

In the Mediterranean, climate change implies numerous risks for ecosystems and for human well-being. Therefore, it is crucial to update and consolidate the best scientific knowledge about climate and environmental perturbations in the Mediterranean basin and to make it accessible to policy-makers, key stakeholders and citizens. The objective of this Broadcasted RoundTable is to exchange between academics, practitioners and institutional representatives on ways to enrich the EU-Med research agenda and actions on climate change.

Speakers and Programme :

10.00 – 10.10 | Introductory Notes

10.10 – 10.20 | Building a research agenda about climate change-related issues: What are the priorities for the UfM?
