

**Will the beach you visit every
summer still be there in 2050?**

Will the beach you visit every summer will still be there in 2050?

***Wetlands have lost
half of their surface
since 1900.***

***The sea is rising
by 3 mm per year,
twice as fast as in
the last century.***

***1/3 of Mediterranean inhabitants
live along the coast.***

**What do these changes mean
for our communities and ecosystems?**

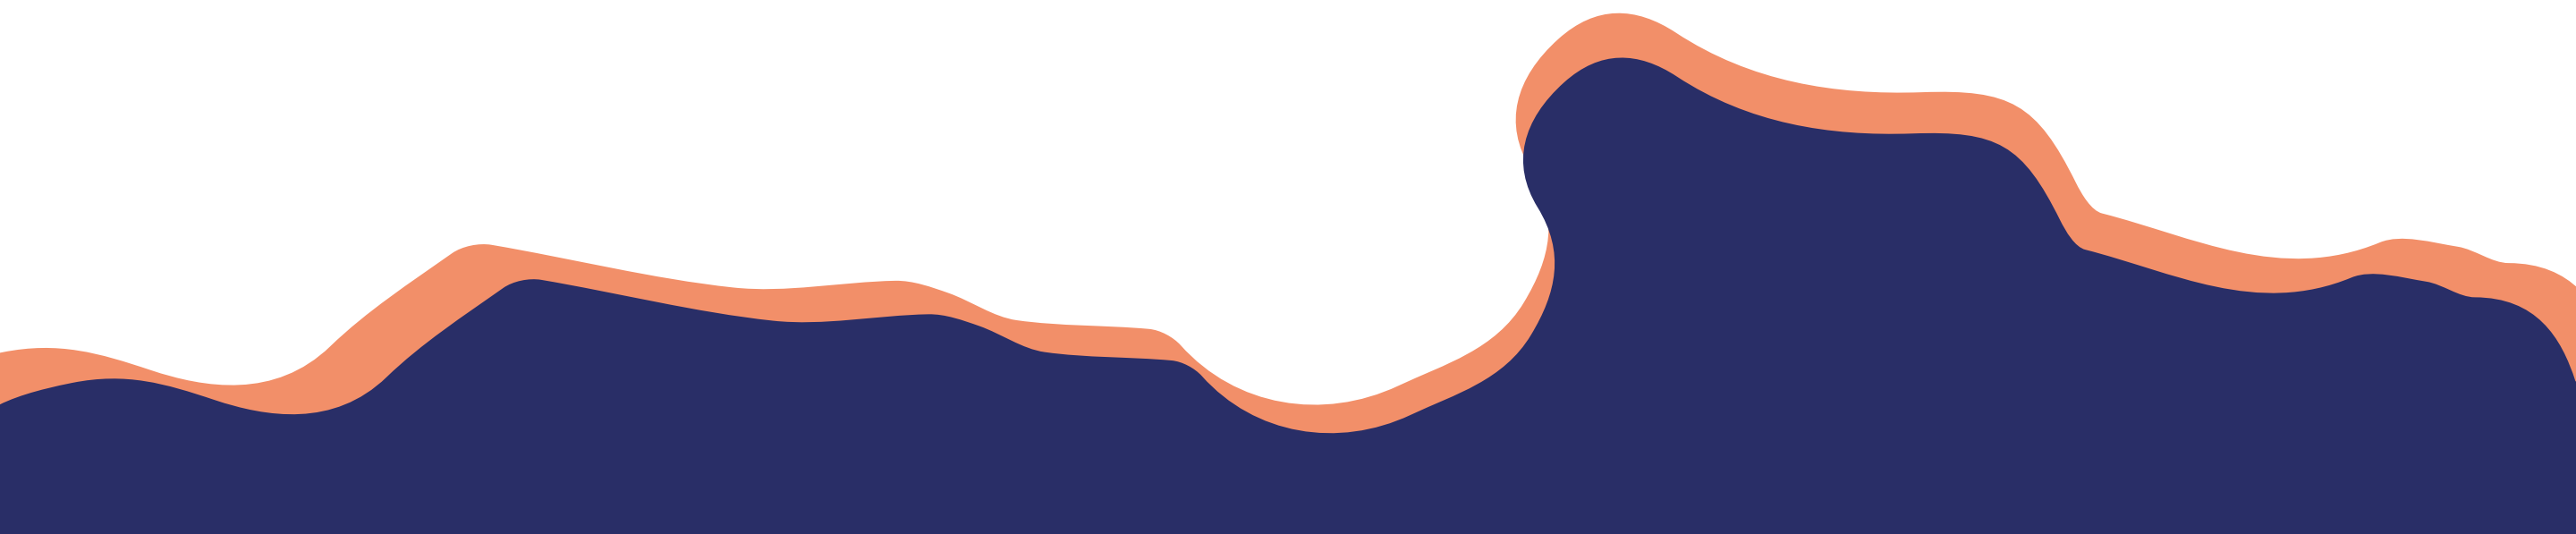

***Flood risk could increase
by 50% by 2100.***

***20 million people could be forced
to leave their homes.***

**Climate change affects our way of life,
economy and tourism, the ecosystems...**

**How can anticipate and reduce these risks?
we preserve both our livelihoods
and natural protection systems?**

What actions can we take today to ensure a resilient Mediterranean coast?

**Our report on coastal risks
in the Mediterranean
highlight possible solutions:**

***Integrated land-sea
governance
+ mini explication***

***Wetland restoration
+ mini explication***

***Planned relocation
+ mini explication***
